# QR Code Silicone Bracelets

--- An ideal gift item suitable for promotions, premiums, advertisement, home decoration, sports, and events

## What is QR code?

The "QR code" is a matrix code (or two-dimensional barcode) derived from "Quick Response". QR Codes storing addresses and URLs may appear in magazines, on signs, buses, business cards or just about any object that users might need information about. Users with a camera phone equipped with the correct reader software can scan the image of the QR Code causing the phone's browser to launch and redirect to the programmed URL.

## Which devices can scan QR Codes?

iPhone, Blackberry, Android, Windows, and any other smartphone or tablet with a camera and a facility to install apps.
